SUMMARY

Software Engineer with **3+ years of experience** in Java, Spring Boot, Microservices, REST APIs, SQL, and production support. Experienced in backend development, database optimization, CI/CD, Kafka, Linux, application deployment, and troubleshooting. Hands-on with **Generative AI, LLMs, RAG, LangChain, Ollama, and AI-assisted development** through practical projects.

EXPERIENCE

NMSWorks Software Pvt. Ltd.

Software Developer (Technical Support Engineer)

April 2024 – Present

Chennai, India

- Developed backend services using **Java, JavaScript, SQL, and Microservices**.
- Worked on **Dashboard, DMS, EMS, CMS, and RMS** modules for network management systems.
- Developed and integrated **REST APIs** with backend services and databases.
- Optimized **MySQL queries** and database operations for application performance.
- Investigated production issues using **logs, debugging, and root cause analysis**.
- Managed application builds and deployment workflows using **Jenkins and JFrog Artifactory**.
- Supported **Apache Kafka** configuration and monitoring for real-time data processing.
- Configured and supported **Apache Tomcat and Linux** production environments.

ICMR – National Centre for Disease Informatics and Research

Project Technical Support III – Programmer

March 2023 – April 2024

Bengaluru, Karnataka

- Developed and maintained the **Hospital-Based Cancer Registry (HBSR)** dashboard.
- Implemented data integration and near real-time updates for public health reporting.
- Enhanced the **DNMS application** for nationwide diabetes research data collection.
- Implemented **Central ODK Collector (COC)** for mobile data collection and validation.
- Developed web applications using **React, Angular, Java, and MySQL**.
- Performed application troubleshooting, optimization, and production support.

MountBlue Technology Pvt. lim.

Software Developer Trainee

June 2022 – Sep. 2022

Bengaluru, Karnataka

- Developed application components using **Java, JavaScript, SQL, and REST APIs**.
- Implemented backend functionality and database operations for web applications.
- Performed **debugging, testing, and troubleshooting** during application development.
- Supported application deployment and server-side configuration.
- Collaborated with developers to implement features and resolve technical issues.

PROJECTS / PUBLICATIONS

Technical Articles – DEV Community

AI-Powered API Gateway with Spring Boot

- Built an AI-powered API gateway using **Spring Boot, Java, REST APIs, and Microservices**.
- Integrated **LLMs** to interpret natural-language requests and identify API intent.
- Implemented request validation, service routing, and API response handling.

AI-Assisted Code Review

- Built an AI-assisted development workflow using **Claude Sonnet** for source-code analysis.
- Applied AI assistance for **debugging, refactoring, testing, and code improvement**.
- Explored automated identification of code quality and potential security issues.

RAG-Based PDF Reader

- Built a document Q&A application using **Node.js, LangChain, Ollama, and Hugging Face**.
- Implemented a **RAG pipeline** with document extraction, chunking, embeddings, and retrieval.
- Integrated local LLM inference using **Ollama** for contextual document Q&A.

EDUCATION

Cochin University of Science and Technology (CUSAT) <i>Master of Computer Applications (MCA) – CGPA: 9.0/10</i>	2020 – 2022 Kochi, Kerala
Indian Institute of Technology Patna (IIT Patna) <i>Professional Certification in Artificial Intelligence and Machine Learning</i>	2026 – Present Patna, Bihar

TECHNICAL SKILLS

- Languages** : Java, JavaScript, TypeScript, Python, SQL
- Backend** : Spring Boot, REST APIs, Microservices, Node.js
- Frontend** : React.js, Angular, HTML/CSS
- Databases** : MySQL, PostgreSQL, Query Optimization
- DevOps** : Jenkins, JFrog Artifactory, Git, Linux, CI/CD
- Messaging** : Apache Kafka, Event-Driven Architecture
- AI/ML** : Generative AI, LLMs, RAG, LangChain, Ollama, Hugging Face
